Letter of Transmittal

His Honour, The Honourable Dr. Gordon L. Barnhart
Lieutenant Governor of the Province of Saskatchewan
Government House
4607 Dewdney Avenue
Regina, Saskatchewan
S4P 3V7

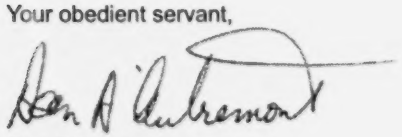
Dear Sir:

Letter of Transmittal

I have the honour to submit herewith the sixty-third Annual Report of the Saskatchewan Liquor Board Superannuation Commission, together with the financial statements, for the fiscal year ending December 31, 2007, pursuant to the provisions of Section 54 of *The Liquor Board Superannuation Act*.

I have the honour to be, Sir,

Your obedient servant,



Dan D'Autremont
Minister in Charge
Liquor Board Superannuation Commission

Letter of Transmittal

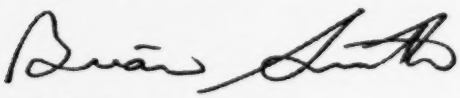
The Honourable Dan D'Autremont
Minister in Charge
Liquor Board Superannuation Commission
Regina, Saskatchewan

Sir:

Letter of Transmittal

I have the honour to submit herewith the sixty-third Annual Report of the Saskatchewan Liquor Board Superannuation Commission, together with the financial statements, for the fiscal year ending December 31, 2007, pursuant to the provisions of Section 54 of *The Liquor Board Superannuation Act*.

Respectfully submitted,



Brian Smith
Chairman
Liquor Board Superannuation Commission

Liquor Board
Superannuation Commission

Introduction

The primary purpose of the Commission is to provide pension benefits to employees in the event of retirement and secondarily in the event of termination of employment. The plan also provides benefits to the dependents of deceased employees and superannuates in the event of death either prior, or subsequent to retirement.

The Commission, which consists of three members appointed by the Lieutenant Governor in Council, is responsible for the administration of The Liquor Board Superannuation Act.

Liquor Board
Superannuation Commission

Brian Smith	Chairman
Barry Lacey	Member
Randy Werner	Member

Operation of the Plan

This plan is a Defined Benefit pension plan, which provides a benefit based on an employee's highest earnings during specified periods taking into consideration their total years of service to a maximum of 35 years. Currently employees who are contributing to the plan make contributions at a rate of 7%, 8% or 9%, depending on their age when they entered the plan. This contribution is offset by an amount equal to 1.8% of their pensionable earnings between the Year's Basic Exemption and Year's Maximum Pensionable Earnings as defined on an annual basis by the Canada Pension Plan.

The Superannuation (Supplementary Provisions) Act was amended on March 27, 2007. This amendment provides indexing each April 1 to superannuates based upon seventy percent of the year over year increase in the Saskatchewan Consumer Price Index.

If there are insufficient monies in the Fund to pay allowances or other payments, the Liquor and Gaming Authority is obligated to pay any such deficiency to the Fund.

The following table below shows the number of active and retired employees in the plan as of the current and prior year-ends:

	December 31, 2007	December 31, 2006
Active Employees	44	51
Inactive Members	3	3
Retired Employees *	201	197
Totals	**248**	**251**

*Includes Superannuates, plus their dependents that are now in receipt of a survivor pension.

Benefit Payments

During the plan year, benefit payments are made in accordance with the Plan rules due to retirement of employees, termination of employment and death benefits – either due to death of an employee or a superannuate.

The attached tables show all the individuals who retired during the year, split into various categories as to type of retirement.

Contributions to the Plan

In accordance with the contribution schedules outlined above, employee contributions to the plan during the year totaled $163,943 compared to $163,756 for the previous fiscal year. In addition, $129,109 in contributions was transferred in for an employee who transferred from the Public Service Superannuation Plan.

Retirement Summary

	December 31, 2007	December 31, 2006
Attained Age 65	-	1
Attained Age 60 – no reduction	4	2
Attained 35 years of Service	2	2
Age 55 and 30 years service – reduced pension	2	1
Ill Health Pensions	-	-
Deferred Allowances now Payable	-	-
Early Retirement Allowances	-	-
Totals	**8**	**6**

Death Benefit Summary

	December 31, 2007	December 31, 2006
Employee Survivor Pension	-	-
Employee Cash Benefit	-	-
Superannuate Survivor Pension	6	6
Superannuate Cash Benefit	-	-
Totals	**6**	**6**

Termination of Employment Summary

	December 31, 2007	December 31, 2006
Deferred Pension	-	-
Cash Refund	-	-
Totals	**-**	**-**

Detailed listings of all transactions are included at the end of this report.

Investment Performance

The Liquor Board Superannuation Commission is responsible for holding in trust and investing the monies in the Plan. The Commission has retained Greystone Capital Management Inc. to be the investment manager.

The investment manager makes the day-to-day decision of whether to buy or sell specific investments in order to achieve the long-term investment performances set out by the Commission in their Investment Policy Statement for the Liquor Board Superannuation Fund (Fund). It is against these long-term investment performance objectives that the Commission assesses the performance of the investment manager.

The Fund's long-term investment performance objective is to outperform a benchmark portfolio constructed.

Asset Class	Market Index	Weight
Canadian	S&P/TSX Composite CPMS CAP 10 Index	22%
US	S&P 500 US Stock Index	14%
Non-North American	MSCI EAFE Index	14%
Fixed Income Bonds	SCM universe Bond Index	45%
Short-Term Investments	91 Day Canadian Treasury Bill	5%
Total		**100%**

The objective of the Fund is to achieve a return that is equal to or greater than the return achieved from this benchmark portfolio over a rolling four-year period. The performance history of the Fund as of December 31, 2007 has been:

	1-Year Return	Rolling 4 Year Average
Fund's Return	3.6%	9.4%
Benchmark Return	1.7%	7.9%

Cash Flow Forecast

The total cash inflow is the amount of employee and employer contributions expected to be received by the pension plan together with a rate of return of 6%. The total cash outflows are the amounts that are required to pay all pension obligations. Forecast of cash flows have been determined using the following long term assumptions:

Factor	Current Year Assumptions	Prior Year Assumptions
Discount Rate	5.35%	4.75%
Interest Rate	6.00%	6.00%
Inflation	2.50%	2.50%
Salary Escalation	3.50%	3.50%

The actuarial valuations prepared by Eckler Ltd., also take into consideration mortality under the plan, which is reflected in the Net Cash Flow Forecasts. For the current valuation the mortality tables have been updated and reflect the most recent mortality studies (Mortality Table UPM 1994 Projected to 2015)

Year	Net Cash Outflows (000's)
2008	$(63)
2009	82
2010	214
2011	329
2012	403
Total next 5 Years	$965
Total 6-10 Years	$3,259
Total 11-30 Years	$11,344

Administration

The Public Employees Benefits Agency (PEBA) has responsibility for the operation, administration and management of several superannuation plans and other employee benefits programs. Administration of the Liquor Board Superannuation Plan is carried out in conjunction with similar plans administered by PEBA.

Changes to administrative processes will continue to be evaluated with the intent of identifying opportunities for improving customer service and becoming more responsive to the needs of the Commission and the membership.

Management's Report

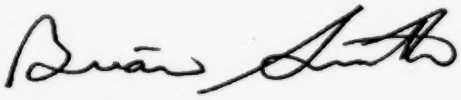
To the Members of the Legislative Assembly of Saskatchewan

Administration of the Plan is presently assigned to the Public Employees Benefits Agency of the Ministry of Finance. Management is responsible for financial administration, administration of the funds and managing of assets.

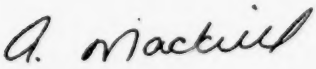
The financial statements which follow have been prepared by management in conformity with accounting principles generally accepted in Canada. Management uses internal controls and exercises its best judgment in order that the financial statements reflect fairly the financial position of the Plan.

The present value of the accrued pension benefits is determined by an actuarial valuation. Actuarial valuation reports require best estimate assumptions about future events which require approval by management.

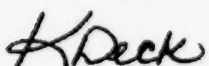
The financial statements have been audited by the Provincial Auditor whose report follows.



Brian Smith
Assistant Deputy Minister
Public Employees Benefits Agency



Ann Mackrill
Director, Pension Programs
Public Employees Benefits Agency



Kathy Deck
Director, Financial Services
Public Employees Benefits Agency

Regina, Saskatchewan
February 15, 2008

Actuaries' Opinion

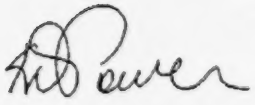
Eckler Ltd. was retained by the Liquor Board Superannuation Commission (the Commission) to perform an actuarial valuation of the accrued pension benefits of the Liquor Board Superannuation Plan (the Plan) on an accounting basis as at September 30, 2005. Eckler Ltd. was further retained to extrapolate the results of this valuation to December 31, 2007.

The valuation and extrapolation were based on:

- Membership data provided by the Commission as at September 30, 2005;
- Asset data provided by the Commission as at December 31, 2007;
- Methods prescribed by The Canadian Institute of Chartered Accountants for pension plan accounting; and
- Assumptions about future events (economic and demographic), which were developed by management and Eckler Ltd., and are considered as management's best estimate of these events.

While the actuarial assumptions used to estimate the accrued pension benefits for the Plan's financial statements contained in the Annual Report represent management's best estimate of future events, and while in our opinion these assumptions are not unreasonable, the Plan's future experience will differ from the actuarial assumptions. Emerging experience differing from the assumptions will result in gains or losses that will be revealed in future valuations, and will affect the financial position of the Plan.

We have tested the data for reasonableness and consistency with prior valuations and in our opinion the data are sufficient and reliable for the purposes of the valuation and the extrapolation. Our opinions have been given and our valuation and extrapolation have been performed in accordance with accepted actuarial practice.



K. Dawn Power, FSA, FCIA
Eckler Ltd.

Liquor Board Superannuation Commission

Liquor Board Superannuation Plan

Financial Statements

Year Ended December 31, 2007

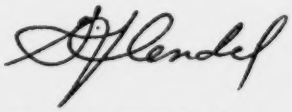
Auditor's Report

To the Members of the Legislative Assembly of Saskatchewan

I have audited the statement of net assets available for benefits, accrued pension benefits and unfunded liability of the Liquor Board Superannuation Plan as at December 31, 2007 and the statements of changes in net assets available for benefits, and changes in accrued pension benefits for the year then ended. The Plan's management is responsible for preparing these financial statements for Treasury Board's approval. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In my opinion, these financial statements present fairly, in all material respects, the net assets available for benefits, accrued pension benefits and unfunded liability of the Plan as at December 31, 2007 and the changes in net assets available for benefits and changes in accrued pension benefits for the year then ended in accordance with Canadian generally accepted accounting principles.



Regina, Saskatchewan

Liquor Board Superannuation Commission

Liquor Board Superannuation Plan
Notes to the Financial Statements

December 31, 2007

1. Description of the Plan

a) **General**

The Liquor Board Superannuation Plan is a defined benefit final average pension plan established under *The Liquor Board Superannuation Act* (Act). The Act also established the Liquor Board Superannuation Fund to account for all transactions of the Plan. Membership is comprised of employees of the Liquor and Gaming Authority (previously Liquor Board) who were enrolled on October 1, 1977 and who did not elect to transfer to the Public Employees Pension Plan prior to October 1, 1978. When a member of the Public Service Superannuation Plan or the Saskatchewan Power Corporation Superannuation Plan becomes an employee of the Liquor and Gaming Authority, the members' accumulated contributions and interest are transferred to the Liquor Board Superannuation Plan and the members are given credit for his/her full service under the former plan.

Complete Plan details are contained in the Act, *The Superannuation (Supplementary Provisions) Act and The Superannuation Acts Uniform Regulations.*

b) **Administration**

The Liquor Board Superannuation Commission administers the Plan. Day-to-day administration is provided by the Public Employees Benefits Agency.

c) **Funding Policy**

Members contribute at the rate of 7%, 8% or 9% of salary depending on their age at the date of commencement of employment. Contributions are reduced by an amount equal to deemed Canada Pension Plan contributions. The employer contributes a fixed percentage of the members' contributions as necessary to fund the benefits provided by the Plan. This rate is set periodically by the Commission on the advice of the Actuary.

d) **Retirement**

Normal retirement is at age 65. Employees may retire earlier under certain conditions.

e) **Pensions**

Annual pensions are calculated as 2% of a member's average salary during the five years of highest salary, multiplied by the total number of years of service to a maximum of 35. At age 65, members' pensions are reduced due to integration with the Canada Pension Plan.

2. Significant Accounting Policies

The financial statements are prepared in accordance with Canadian generally accepted accounting principles. The following accounting policies are considered significant.

a) **Investments**

Pooled funds are recorded based on the net asset value per unit of the underlying assets on the last valuation date of the Plan's year end.

The change in the market value of investments during the year is reflected on the financial statements as a market value adjustment.

b) **Investment Transactions and Income**

Investment transactions are recorded on the trade date. Transactions conducted in foreign currencies are translated into Canadian dollars using the exchange rate in effect at the transaction date. Dividend income is recognized on the record date. Monetary items denominated in foreign currency are translated at the exchange rate in effect at year-end.

c) **Recent Accounting Pronouncements**

Effective January 1, 2008, the Plan will be required to adopt the Canadian Institute of Chartered Accountants (CICA) handbook sections 3862 – Financial Instruments – Disclosures, and 3863 – Financial Instruments – Presentation. Section 3862 provides standards for disclosure of the risks arising from financial instruments to which the Plan is exposed, and how the risks are managed by the Plan. Section 3863 provides standards for the presentation of financial instruments and non-financial instrument derivatives. The Plan does not expect the adoption of these new standards to have a material impact on its financial statements.

d) **Use of Estimates**

Canadian generally accepted accounting principles require management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. Differences are reflected in current operations when identified.

3. Investments

Due to the long-term horizon of the Plan's liabilities, the Plan takes a long-term investment perspective. The strategy employed is to invest cash flows from contributions and investment returns into pooled funds.

a) **Interest Rate Risk**

Interest rate risk refers to the adverse consequences of interest rate changes on the Plan's cash flows, financial position and income. This risk arises from differences in the timing and amount of cash flows related to the Plan's assets and liabilities. The value of the Plan's assets is affected by short-term changes in nominal interest rates and equity markets. Interest rate risk is managed by investing in a fixed income pooled fund that varies the duration of fixed term securities.

b) **Credit Risk**

Credit risk arises from the potential for an investee to fail or for an issuer to default on its contractual obligations to the Plan. The Plan limits the credit risk by dealing with issuers that are considered to be high quality.

c) **Foreign Currency Risk**

Foreign currency exposure arises from the Plan holding investments denominated in currencies other than the Canadian dollar. Fluctuations in the relative value of the Canadian dollar against these foreign currencies can result in a positive or negative effect on the value of investments. The Plan limits the foreign currency risk by limiting the investment in foreign funds.

d) **Market Risk**

Market risk is the risk that the value of an investment will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual investment, or factors affecting all securities traded in the market. The Board's policy is to invest in a diversified portfolio of investments, based on criteria established in the Statement of Investment Policies and Goals.

Pooled Funds

The Plan's units in pooled funds have no fixed interest rate and the returns are based on the success of the fund manager. The Plan's pooled funds are comprised of the following:

	Units Held		% of Total Units Outstanding		Market Value		Investment Income and Change in Market Value	
	2007	**2006**	**2007**	**2006**	**2007**	**2006**	**2007**	**2006**
	(000's)				(000's)		(000's)	
Greystone Fixed Income Fund	616	696	1.47	1.83	$ 6,193	$ 7,056	$180	$ 320
Greystone Canadian Equity Fund	106	118	0.24	0.34	3,111	3,471	399	688
Greystone EAFE Plus Fund	205	202	0.12	0.15	2,085	2,433	(43)	548
Greystone US Equity Fund	167	189	1.64	2.25	1,981	2,321	(67)	190
Greystone Money Market Fund	149	85	0.97	1.53	1,488	853	49	33
					$14,858	$16,134	$518	$1,779

The Greystone EAFE Plus Fund holds units in the Greystone EAFE Quantitative Fund and the Greystone EAFE Growth Fund. These funds may use derivative financial instruments such as foreign currency forward exchange contracts and future contracts for hedging foreign currency and replicating indexes.

Derivative financial instruments are financial contracts that change in value resulting from changes in underlying assets or indices. Derivatives transactions are conducted in over-the-counter markets directly between two counterparties or on regulated exchange markets. All derivative financial instruments are recorded at market value using market prices. Where market prices are not readily available, other valuation techniques are used to determine market value.

4. Obligation for Accrued Pension Benefits

An actuarial valuation of the Liquor Board Superannuation Plan was performed as at September 30, 2005 and extrapolated to December 31, 2007 by Eckler Ltd. The actuary used the projected benefit method prorated on services to determine the actuarial present value of accrued pension benefits.

The pension liability is based on a number of assumptions about future events including: discount rate, rate of salary increase, mortality, retirement rates and inflation. The actual rates may vary significantly from the long-term assumptions used.

Significant long-term actuarial assumptions used in determining the accrued pension benefits were:

	2007	2006
Salary escalation rate	3.50%	3.50%
Inflation rate	2.50%	2.50%
Discount rate	5.35%	4.75%
Mortality table	1994 UPM (Projected to 2015)	1994 UPM (Projected to 2015)

The *Superannuation (Supplementary Provisions) Act* was amended on March 27, 2007. The amendment provides indexing to superannuates each April 1 based upon 70% of the year over year increase in the Consumer Price Index and replaces the ad hoc indexing provided in prior years.

The following illustrates the effect of changing certain assumptions from assumed rates of: inflation 2.50%, salary 3.50% and discount rate 5.35%.

	Long-Term Assumptions					
	Inflation*		Salary		Discount Rate	
	3.5%	1.5%	4.5%	2.5%	6.35%	4.35%
(Decrease) increase in liability	(3.7%)	3.9%	0.9%	(0.9%)	(10.3%)	12.4%

* A change in the inflation rate of 1% has a corresponding change in the discount rate of 1%, in the salary scale of 1%.

The change in the discount rate from 4.75% to 5.35% resulted in a decrease in the present value of accrued pension benefits by $3,576,000. The experience gain of $102,000 was a result of the indexing effective April 1, 2007 being at 1.40% rather than the assumed rate of 1.75%. A new member transferred in from the Public Service Superannuation Plan resulting in an increase in the accrued pension benefits by $1,211,000.

The unfunded liability is not payable immediately. The cash inflow from employee and employer contributions and the cash outflow to pay the required pension obligation are calculated using the above assumptions. The cash inflows include a 6% assumed rate of return on investments. The net cash outflows in the next 5 years would be $965,000, in the next 10 years $3.3 million and in the next 30 years $11.3 million. If there are insufficient monies in the Fund to pay allowances or other payments, the Liquor and Gaming Authority is obligated to pay any such deficiency to the Fund.

The unfunded liability could be funded if the employer contributes approximately $3,809,000 to the Fund each year for 15 years assuming a discount rate of 5.35%.

5. Due From General Revenue Fund

The Liquor Board Superannuation Plan bank account is included in the Consolidated Offset Bank Concentration (COBC) arrangement for the Government of Saskatchewan.

The Plan's earned interest is calculated and paid by the General Revenue Fund on a quarterly basis into the Plan's bank account using the Government's thirty-day borrowing rate, and the Plan's average daily bank account balance. The Government's average thirty-day borrowing rate in 2007 was 4.26% (2006 – 3.95%).

6. Related Party Transactions

Included in these financial statements are transactions with various Saskatchewan Crown corporations, ministries, agencies, boards and commissions related to the Plan by virtue of common control by the Government of Saskatchewan and non-Crown corporations and enterprises subject to joint control or significant influence by the Government of Saskatchewan collectively referred to as "related parties". The administration expenses of the Plan are paid to the Public Employees Benefits Agency (PEBA) Revolving Fund.

Other transactions with related parties and amounts due to or from them are disclosed separately in these financial statements and notes.

Related party transactions with the Plan are in the normal course of operation and are recorded at exchange amounts agreed to by the parties to the transactions.

7. Investment Performance

The investment manager makes day-to-day decisions on whether to buy or sell investments in order to achieve the long-term performance objectives set by the Commission. The Commission reviews the investment performance of the plan in terms of the performance of the benchmark portfolio over 4 year rolling periods. The primary long term investment performance objective for the entire portfolio is to outperform a benchmark portfolio.

The following is a summary of the Plan's investment performance:

	2007	Rolling Four Year Average Annual Return
Plan's actual rate of return (a)	3.6%	9.4%
Target rate of return (b)	1.7%	7.9%

(a) The annual return is before deducting investment expenses.

(b) The Plan's target rate of return for its investment portfolio (return on the benchmark portfolio) has been determined using the actual returns of the market indexes such as the Toronto Stock Exchange 300 Capped 10% Index, Morgan Stanley Capital International Europe Australia Far East Index and the Scotia Capital Universe Bond Index.

8. Administration Expenses

	2007		2006
	Budget	Actual	Actual
Administration - PEBA Revolving Fund	$76,784	$63,956	$ 70,140
Investment management fees – Greystone*	-	30,779	31,448
	$76,784	$94,735	$101,588

*Investment management fees are based on the market value of the portfolio.

9. Fair Value of Financial Assets and Financial Liabilities

The pension liability is long-term in nature and there is no market for settling these pension obligations. Therefore, determination of the fair value of the pension liability is not practical (note 4).

The following method and assumptions were used to estimate the fair value of each class of financial assets and financial liabilities:

Fair values of investments are considered to be market values (note 2).

For the following financial instruments the carrying amounts approximate fair value due to the immediate or short-term nature of these financial assets and financial liabilities.

a) employees' and employer's contributions receivable
b) other receivables
c) due from General Revenue Fund
d) accounts payable and accrued liabilities
